

Knights of the Round Table

The name of the legendary British king who pulled his sword, Excalibur, from a stone was:

The Kitchen Knight's real name was:

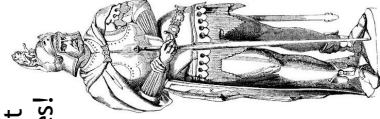

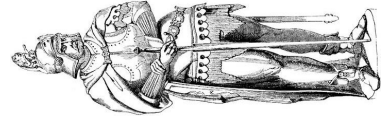

He fights the other knights and wins the love of:

Knights of the

Round Table

Color the pictures to match the colors of the knights that the Kitchen Knight fought on his adventures!

To assemble the Knights of the Round Table Activity:

Cut out both pieces. Flip the cover piece face down, and glue the activity page onto it. Allow to dry, and fold along the center line to form a mini-book. Be sure when you are positioning the books that the writing will be facing the correct direction when the book is assembled and folded.

(For older children, you may encourage them to design all or part of the interior of the book themselves, or you may give them a different assignment for the interior of the book.)

Fill out the booklet, using the information in the online King Arthur activity and The Kitchen Knight book. Color each knight a shade that matches the colors of Gareth's opponents.
